	CAPACITY													5 qt

Note: This chart is for convenience only. Always refer to the owner's manual for exact fluid specifications. All capacities are approximate and include an oil filter change. Always use the dipstick to determine the proper amount of oil in the engine.

*Genuine 5W-30 conventional oil can be used, but synthetic is recommended (Factory filled with Synthetic Ester Oil).

Oil Recommendations for 2019 QX50

INFINITI Aftersales is providing updated guidance on engine oil requirements for the 2019 QX50. This new variable compression turbo engine with oil drain intervals of 7,500 miles should use a full synthetic 5W-30 GF-5 SN engine oil. Please reference IPSB/18-156; dated April 1, 2018, for more detailed information.

A conventional 5W-30 product is not recommended for this engine.

- The current owner's manual references Genuine Nissan Ester Oil 5W-30 which is being replaced by Mobil 1 5W-30 as the primary recommended oil.
- An alternative engine oil should be a synthetic 5W-30 product with GF-5 SN approval
- Mobil Super Synthetic 5W-30 can be used as an alternative and is also available on the INFINITI Oil Program.
- Future owner's manuals will be updated to reflect the above guidance.
